### Aims and Content

In the summer semester of 2024, FH Campus Wien will host the first INUAS COIL Days. The event will centre around the practical implementation of Virtual Exchange/COIL (Collaborative Online International Learning) projects. Participants will have the opportunity to get together with colleagues from other INUAS universities (FH Campus Wien, Hochschule München, Zurich University of Applied Sciences) as well as some of our international partner universities, and to exchange their knowledge and experiences of implementing Virtual Exchange in the classroom. Participants will be shown practical examples by colleagues and will receive input from COIL experts to help them internationalise their own teaching and to find ideas and partners for future COIL projects.

### Key takeaways

By the end of the INUAS Staff Days participants will be able to:

- develop their own Virtual Exchange/COIL project
- find Virtual Exchange/COIL partners within and beyond the INUAS network
- implement Virtual Exchange/COIL projects within and across disciplines
- Participants will have expanded their own network and engaged in professional exchange.

The main objective is to share knowledge, discuss the opportunities and challenges of Virtual Exchange/COIL in higher education, and initiate new cooperation within and beyond the INUAS network.

### Who should participate?

- “Newcomers” who would like to implement Virtual Exchange/COIL projects in their own teaching and are looking for partners.

- Lecturers from INUAS partner universities and other international partner universities who have already implemented Virtual Exchange/COIL in their teaching and are interested in connecting and sharing their experiences with colleagues as well as expanding their professional network.
